

Dominique Armstrong, BS

Graduate Student

Baylor College of Medicine

MAGE-A4 Induces Tumor-Promoting Plasma Cells in NSCLC

Dominique graduated from Whitworth University with a BS in Biology and minors in Chemistry and Music. Before coming to Baylor College of Medicine, she worked in environmental microbiology and in clinical pathology. She is currently in the Translational Biology and Molecular Medicine graduate program at Baylor College of Medicine in Dr. Farrah Kheradmand's lab studying plasma cells in lung cancer.
